PALM TREES MONTESSORI SCHOOL'S HISTORY

Palm Trees Montessori School is the brand new development catering to the next level of education after the provision of Kindergarten in "Kiddy Montessori" School. Kiddy Montessori was established in 2000. Kiddy Montessori offered the highest educational standard, development of strong values and cooperative social skills, challenging program based on individually focused and social development, the benefits of self discovery, self confidence and social competence, development of independence, concentration, a sense of order and self discipline in nurturing, supportive atmosphere. Initially, Kiddy Montessori provided a program for children aged 2-6 years old. But as they get older, they need the next level of education that meets their growing needs. After 9 years, we have expected our prestigious institution to cater for elementary level and changed our school's name to Palm Trees Montessori (PMS), which now offers Preschool-level classes.

CURRICULUM

The curriculum is based on the North American Montessori Center (NAMC) approach. In Preschool and Kindergarten, students use Montessori materials in the areas of Practical Life, Sensorial, Language, Mathematics, and Culture. At the Elementary level, students explore Advanced Practical Life, the Five Great Lessons, Cosmic Education, Peace, History, Physical Geography, Cultural Geography, Botany, Zoology, Science Experiments, Health Science, Art & Music, Matter & Astronomy, Physical/Cultural Geography, Energy, Scientific Method & Technology, Ecology, Mathematics, and Language Arts. They develop enthusiasm for both their schoolwork and exploring the world around them. Additionally they will cultivate essential academic skills such as using the library, how to work with computers and the internet, and improve their communication skills.

VISION

"Becoming a School Of Life"

MISSION

- Prepare the children to be an independent learner.
- Prepare the children to love learning along their life.
- Prepare the children how to take care of themselves, other people, and the environment.
- Discover the children's potential.

INCLUSIVE EDUCATION PROGRAM

The Inclusive Education Program is not separate from the main curriculum. Instead, it provides a structured support system integrated within the classroom. Instead, it is a structured support system integrated within the classroom. Its focus is to ensure that every student can access and engage with the Montessori curriculum optimally according to their individual developmental needs. The program is designed for students with mild to moderate learning needs who are able to participate in a regular classroom setting with appropriate support.

The Inclusive Education Program follows the same Montessori Elementary curriculum as the regular program. All students learn within the framework of the "Cosmic Curriculum," which views learning as an interconnected journey encompassing the development of the universe, human history, and the individual's role in society.

PROGRAM OBJECTIVES

1. To provide additional support for students who experience challenges with attention, emotional regulation, social interaction, or academic adaptation.
2. To help students reach their full potential within the school environment.
3. To provide a structured intervention system without labeling or stigmatizing students.
